## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 16-21, 24-28, 34 and 35 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claim 24**, AAPA discloses a method for transmitting location-related information from a transmitter to a receiver, the method comprising: including the location-related information in a digital map of the receiver (see page 1 of the applicants' specification, lines 6-10), wherein the location-related information is made up of linear objects (see page 1 of the applicants' specification, lines 6-10). Rauhala 6,680,919 discloses downloading location-related information from the internet to a communication device that has a transmitter and receiver (MCT 10 with transceiver 20, downloading map data from the internet, see fig. 1, col. 3, lines 7-10, 43-57, col. 4, lines 1-23 and lines 52-67).

The instant invention discloses dividing the linear object into a first set of equidistant coordinate points, wherein a traffic route network stored within a digital map of the receiver is divided into a second set of equidistant coordinate points; for at least one point within the first set of points and for a plurality of potential displacement values, calculating the total number of points in the second set of points that lie within a predetermined radius of the at least one point after the linear object has been shifted according to each displacement value; selecting the displacement value corresponding to the greatest of the calculated totals; matching a portion of the traffic route network to the linear object by decoding the linear object in accordance with the selected

Art Unit: 2617

displacement value; and updating the digital map with the decoded linear object. The above novel features in combination with other limitations in the claim are neither taught, suggested, nor made obvious by the AAPA, Rauhala, or any other prior art of record. Claims 16-21 and 25 are allowable by virtue of their dependency on claim 24.

Regarding **claim 26**, AAPA discloses a navigation device comprising: a digital road map (see page 1 of the applicants' specification, lines 6-10); and a receiving arrangement to receive location-related information which can be included in the digital road map (see page 1 of the applicants' specification, lines 6-10), wherein: the location-related information is made up of linear objects (see page 1 of the applicants' specification, lines 6-10). Rauhala 6,680,919 discloses downloading location-related information from the internet to a communication device that has a transmitter and receiver (MCT 10 with transceiver 20, downloading map data from the internet, see fig. 1, col. 3, lines 7-10, 43-57, col. 4, lines 1-23 and lines 52-67).

The instant invention discloses the navigation device being configured to perform the following: divide the linear object into a first set of equidistant coordinate points, wherein a traffic route network stored within the digital road map is divided into a second set of equidistant coordinate points; for at least one point within the first set of points and for a plurality of potential displacement values, calculate the total number of points in the second set of points that lie within a predetermined radius of the at least one point after the linear object has been shifted according to each displacement value; select the displacement value corresponding to the greatest of the calculated totals; match a portion of the traffic route network to the linear object by decoding the linear

Art Unit: 2617

object in accordance with the selected displacement value; and update the digital road map with the decoded linear object.

The above novel features in combination with other limitations in the claim are neither taught, suggested, nor made obvious by the AAPA, Rauhala, or any other prior art of record. Claims 27, 28, 34 and 35 are allowable by virtue of their dependency on claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hayama et al 6,970,786 discloses a method for transmitting map data and map display apparatus and system.
